INSIGHT**

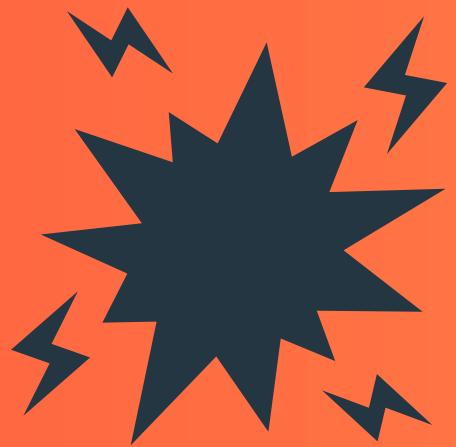

{Names}

Introduction

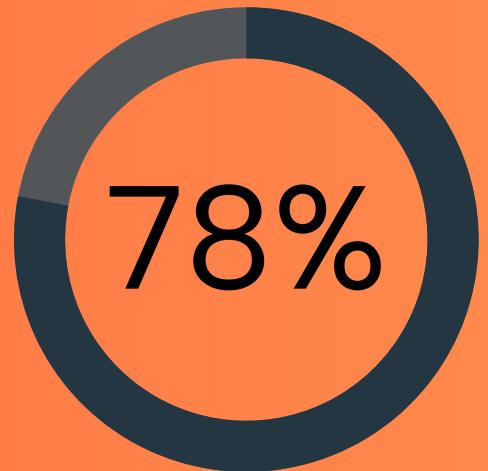

VOLUME OF DATA

- Modern networks generate terabytes of log data daily.
- A medium-sized enterprise can produce 500 GB of log data per day

In 2024, 6.8 billion records were breached in 2,741 publicly disclosed incidents

increased in publicly reported data compromises 2023 compared to 2022

Introduction

PROBLEMS

- On average, manual log analysis can take **hours to days** for a comprehensive review
- Log volume increases by **~50% annually** with network growth
- Inefficient for **large-scale** threat detection

High volume causing alert fatigue: Up to 30% of alerts ignored

Problem Statement

• • •

VOLUME OF DATA

On average, manual log analysis can take **hours** to **days** for a comprehensive review

RECENT EVENTS:

March 2024: DDoS attack on Luxembourg's government websites.

April 2024: Hackers exposed 144 GB of sensitive data from El Salvador's national cryptocurrency wallet.

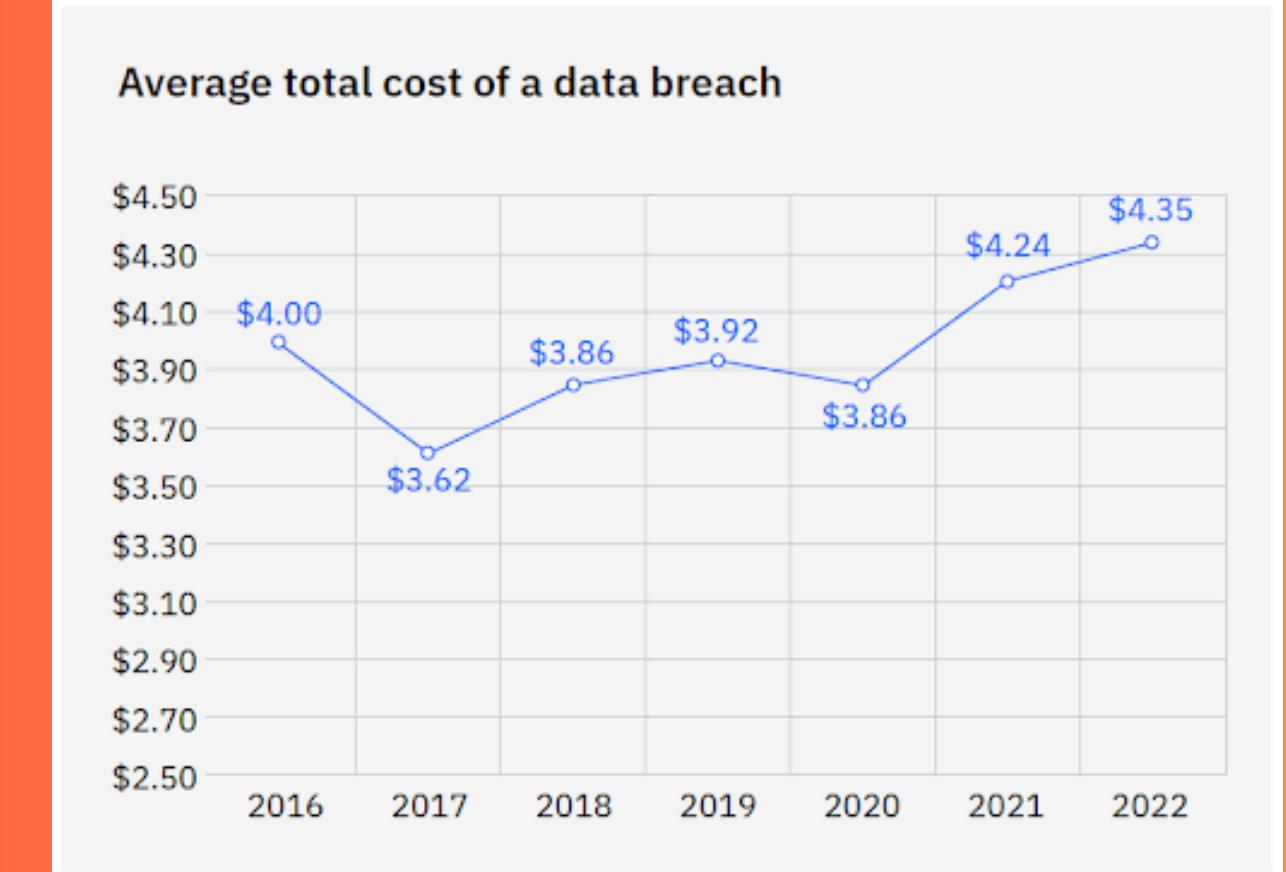

May 2024: Cyber spies targeted India's government and defense sectors with malware.

Introduction

PROBLEMS

- **Delayed Response Times:**
 - Manual processes: **Days to weeks** for incident detection/response
 - **Increases risk** of severe data breaches
- **Evolving Threat Landscape:**
 - **Increasing sophistication** of cyber attacks
 - Requires **adaptive, automated** analysis techniques

The Global Average Cost of a Data Breach between 2016 to 2022
